

**We handle the world.**

**Hydro. Power!**

**Innovative since 1932.**

**künz**

## We handle the world.

Innovative crane solutions that convince worldwide.

## Hydro. Power!

Kuenz technology creates innovative solutions for energy and safety.

**künz**

## Enthusiastic employees are our success guarantee since 1932.

In a modern and pleasant working environment our employees can use and improve their skills self-dependent. For Kuenz it is crucial to support our employees as much as possible. That way our motivated employees can contribute to our mutual success.

# Inspire together.

Kuenz technology creates solutions that inspire worldwide.  
This enthusiasm is a result of high motivation and attitude.

**künz**

**Innovative crane solutions  
that convince worldwide.**

Kuenz has a wide experience in crane manufacturing and offers well-designed high quality products for ambitious customers worldwide. Kuenz manages to keep product, engineering and service quality on a high standard. Kuenz develops, designs and manufactures all main components in-house. This guarantees maximum safety and cost effectiveness.

Hydraulic Type | Rope Type

Ship locks

Customers from all over the world.

Kuenz Core Competence

Kuenz offers first class products and services to its customers coming from different sectors and industries.

- All from one source  
Our strength is to control the entire process from design, production, installation and commissioning, to after-sales support – all from one source – Kuenz.
- High number of qualified engineers  
We support our customers worldwide by using the following best-practice standards: innovation and competence, certified quality, utmost reliability and the excellent knowledge of our engineers, who account for more than 25% of the entire workforce.

The foundation of Kuenz business philosophy is a continuous face-to-face dialogue with our customers. Innovation and competence combined with continuous improvement are the basis of our long-term success. We believe that thoroughly understanding the specific requirements and needs of our customers allows us to provide the right products and services.
